

AI Readiness Audit: anonyfox.com

Technical readability for AI search and crawlers

Domain	https://anonyfox.com
Checked on	14 Oct 2026 16:35 CEST
URLs crawled	120 (119 HTML)
Our crawler	AnonyfoxLabKIAudit/1.0 (+ https://lab.anonyfox.com/ki-readiness-audit/)

Overall score	93 / 100
AI search/fetch bots allowed	25 of 25
Text readable without JavaScript	18 of 20
Title, description, canonical, H1	15 of 15
Structured data	15 of 15
Indexable	10 of 10
XML sitemap	10 of 10
llms.txt	0 of 5

Summary

anonyfox.com scores 93 of 100. 7 of 7 AI search and fetch bots may read the homepage. Of 119 HTML pages checked, 1 have almost no text without JavaScript, 0 lack structured data and 0 lack a meta description. The sitemap lists 117 URLs; an llms.txt is missing.

Key actions (up to 10, sorted by impact)

- Homepage almost empty without JavaScript:** only about 177 characters of text in the homepage HTML. The homepage in particular should carry offer, audience and contact as text in the HTML (server-side rendering or pre-rendering).
- Improve load time:** Largest Contentful Paint (mobile, median of several runs) above 2.5 s on /blog (4.5 s), /portfolio (2.8 s). Compress images, check server response time and render blockers.
- Fix duplicate titles:** 4 pages share a title.
- Reduce layout shift:** CLS above 0.1 on /blog (0.101). Set fixed sizes for images and embeds.
- Publish llms.txt (optional):** draft included. Small effort; benefit not confirmed by AI providers.

This audit measures technical prerequisites. It does not predict or guarantee whether or how often AI systems or search engines mention or rank your website; AI answers vary from query to query.

AI bots per robots.txt (homepage)

GPTBot · OpenAI · training	allowed	*
OAI-SearchBot · OpenAI · search	allowed	*
ChatGPT-User · OpenAI · user fetch	allowed	*
ClaudeBot · Anthropic · training	allowed	*
Claude-SearchBot · Anthropic · search	allowed	*
Claude-User · Anthropic · user fetch	allowed	*

Perplexity-User · Perplexity · user fetch	allowed	*
Google-Extended · Google · training	allowed	*
Applebot-Extended · Apple · training	allowed	*
CCBot · Common Crawl · training	allowed	*

meta-externalagent · Meta · training	allowed	*
Bytespider · ByteDance · training	allowed	*
Amazonbot · Amazon · search	allowed	*
Googlebot · Google · search	allowed	*
Bingbot · Microsoft · search	allowed	*

Page findings (119 HTML pages checked)

no title	0 / 119
title > 65 chars	4 / 119
no meta description	0 / 119
no canonical	0 / 119
not exactly one H1	1 / 119
noindex	0 / 119
under 150 words	16 / 119
almost no text without JS	1 / 119
no JSON-LD	0 / 119
no Open Graph	0 / 119
no lang attribute	0 / 119
images without alt	0 / 968
Schema types	Organization (119), PostalAddress (119), Person (60), BreadcrumbList (42), ListItem (42), SoftwareSourceCode (40), Article (20)

Load time (Lighthouse, mobile, measured locally)

URL	Score	LCP (s)	CLS	TBT (ms)
/	91 (85–92)	2.5 (2.5–3.0)	0.00 (0.00–0.00)	223 (212–265)
/blog	76 (71–78)	4.5 (2.9–4.6)	0.10 (0.10–0.14)	308 (222–339)
/portfolio	88 (88–91)	2.8 (2.5–2.9)	0.00 (0.00–0.00)	235 (225–236)

Median (range) of 3 runs.

Included files

- llms.txt – draft built from your most-linked pages. Review, add descriptions, then publish at /llms.txt.
- robots-ai.txt – suggested robots.txt block: allow search and fetch bots; training crawlers per your decision.

Method and limits

- Crawl of up to 200 URLs (sitemap + internal links), 1 request per second, robots.txt respected. Crawled: 120 URLs.
- robots.txt evaluated per RFC 9309 (most specific user-agent group, longest matching rule). Firewalls or CDN rules that block bots regardless of robots.txt are not visible this way.
- “Text without JavaScript”: visible text in the delivered HTML. Pages under 250 characters are treated as probably filled by JavaScript only.
- JSON-LD is detected and counted, not fully validated against Google guidelines.
- Lighthouse runs 3× per URL on our server (headless Chrome, mobile). Shown are median and range; real-user data (CrUX) may differ.
- llms.txt is a proposal (llmstxt.org); use by major AI providers is unconfirmed, so it counts for only 5 of 100 points.
