

# Schema & llms.txt pack: anyonyfox.com

Paste-ready structured data, built from facts on your website

|                       |                                                                                            |
|-----------------------|--------------------------------------------------------------------------------------------|
| Domain                | https://anyonyfox.com                                                                      |
| Pages analysed        | 119                                                                                        |
| Existing schema types | Organization, PostalAddress, Person, BreadcrumbList, ListItem, SoftwareSourceCode, Article |

## What's in the pack

**01-sitewide-organization-website.jsonld** – ✓ valid JSON; Organization: enthält TODO-Platzhalter / has TODO placeholders

**02-optional-localbusiness.jsonld** – ✓ valid JSON; LocalBusiness: enthält TODO-Platzhalter / has TODO placeholders

**04-breadcrumb-example.jsonld** – ✓ valid JSON; required fields present

**05-template-service.jsonld** – ✓ valid JSON; Service: enthält TODO-Platzhalter / has TODO placeholders

**llms.txt** – 25 pages, descriptions from your meta descriptions.

**llms-full-outline.txt, INSTALL.md**

Rule: we only use facts found on your website. Anything we could not find is marked TODO. Don't invent: structured data must match visible content. Structured data and llms.txt do not guarantee rich results, rankings or mentions in AI answers.

## Sitewide: Organization + WebSite
